## Job Objective

---

I am seeking an opportunity as a full-stack developer. I am skilled at approaching problems analytically and solving them as efficiently as possible. I can work either in groups or as an individual contributor. I am currently pursuing a full stack development course at GA Tech.

## Skills

---

- Node.js, Express, JavaScript, jQuery, React.js, React Native, GIT, Github, Firebase HTML, CSS, Bootstrap, Media Queries, Sequelize, APIs, JSON, REST, AJAX, Testing with JEST, ASP .NET, C++
- MongoDB, MySQL, SQL Server, PowerBI Dashboard
- The command line, Computer Science fundamentals, Object-Oriented Programming
- Office 365, G-Suite, Outlook, SharePoint, JIRA, Confluence

## Education

---

2005 – BS - Computer Science. DAVV, Indore, India; University Gold Medalist and top of the class for all four years

## Projects

---

### Community Connect

[Git Link](#)

- Private social media portal for the subdivision for community news, fundraising, and posting events using Express, MySQL, and Sequelize

### Tech Blog

[Git Link](#)

- A modern eCommerce website's backend APIs for an Internet retail company to ensure competitiveness in the industry using Express, MySQL, and Sequelize

### Worth the Watch

[Git Link](#)

- Worth the watch helps the user decide what movie to watch tonight with a link to the Youtube trailer and recent search history. The app uses calls to YouTube and IMDB APIs to offer suggestions.

### Code Quiz

[Git Link](#)

- Participants are presented with 10 general knowledge questions, with a score at the end

### eCommerce API's

[Git Link](#)

- A modern eCommerce website's backend APIs for an Internet retail company to ensure competitiveness in the industry using Express, MySQL, and Sequelize

### Team Profile Generator

[Git Link](#)

- A Node CLI-based profile generator for all the employees using the Inquirer Package

### Employee Tracker

[Git Link](#)

- An employee tracker system with information about departments, managers, and their subordinates. The application uses a backend MySQL Database for storage.

### [Note Tracker](#)

[Git Link](#)

- A personalized note tracker using JSON storage and Express APIs

### [Weather Dashboard](#)

[Git Link](#)

- The weather dashboard offers the 7-day forecast for the selected City with a responsive user interface

### [Work Day Scheduler](#)

[Git Link](#)

- Select an appointment in the future using limited work hours of 9 am to 5 pm

## Job History
